

I do not support any legislation that would allow more consolidation of media ownership. I think it would have a horrible effect on our democracy if the media, in all forms, is owned by only a handful of huge corporations. I would support any legislation that would reduce this consolidation. Information is power and it should not be controlled by only a few corporations. I do not want the information I receive from the media to only be the information that these corporations or the elected officials that they helped get elected through campaign contributions and media coverage want me to hear. The consequences of media consolidation would be devastating.

Sincerely, Gloria Maker
